OUR SCOPE

■ REASONS TO CHOOSE SUCON

A significant benefit of choosing our team for this project is the wealth of expertise and professional consulting engineering services. Our collective team has a well track of work history demonstrated on current and previous projects. The key benefits of choosing our team are:

Proven Industry Experience

providing construction services for differing Government departments, private sector clients and the wider community.

Commitment to Project Vision and Goals

through consultation, cohesive working groups and dedication to the project.

Quality Results

we are recognized as a professional and dedicated company committed to producing the correct results within specified time frames. Our approach is to ensure continuous communication with our clients so that we can 'do it right the first time.

Highly Skilled, Multidisciplinary Team

our team comprises engineers, architects, designers, skilled surveyors, resulting in a range of viewpoints and approaches to each task.

We aim to provide high-quality outcomes for a competitive price. Offered in this submission is an experienced team of professionals, dedicated to achieving a quality outcome of which Sucon can be proud.

DESIGN AND SUPERVISION EXPERIENCE

Sucon have been commissioned to undertake various design and supervision projects, coupled with our proposed team in which have all involved in numerous relevant projects across various continents of the world. The combined project experience of Sucon's team would be favourable in delivering the scope of works for this project.

Our involvement in various design projects has allowed us to familiarize with various both local and international engineering and building design standards, our experience with previous building and design projects, we are familiar with building permit processes and we will be doing our due diligent by taking proactive measures to familiarize and under the Samoa Government process and proper channelization.

Next pages are some of the previous design and supervision projects that Sucon takes pride in and have been working collaborate with clients to ensure their needs and wants are met.

THE PROJECTS

■ SAVALALO FLEA MARKET REDEVELOPMENT PROJECT.

Sucon successfully completed the concept design of the \$30 million tala Savalalo Flea market Re-development Project. The design has a Warm and inviting space with high ceiling treatment Wave inspired design. The exterior design casts Metallic tone by day and Illuminates at Nights. Sucon engineers and Architect develop the Design to meet the client's request. The rebuilding of the market signifies focus on economic recovery through support to small business, local enterprise, and women's entrepreneurship. The projects is funded by New Zealand government which the occasion marks 60th anniversary of both Samoan independence and the signing of a Treaty of Friendship between the two countries.

Samoa CBS Offsite Building at Ululoloa

Sucon was commissioned by Central Bank of Samoa to carry the master planning of its property Ululoloa. Part of the scope is also to design and document the new proposed offsite building office for construction purposes. The consultant carries out Architectural and Engineering design process. Sucon also assist CBS in procuring competitive contractor, with an estimated project cost of WST \$40M

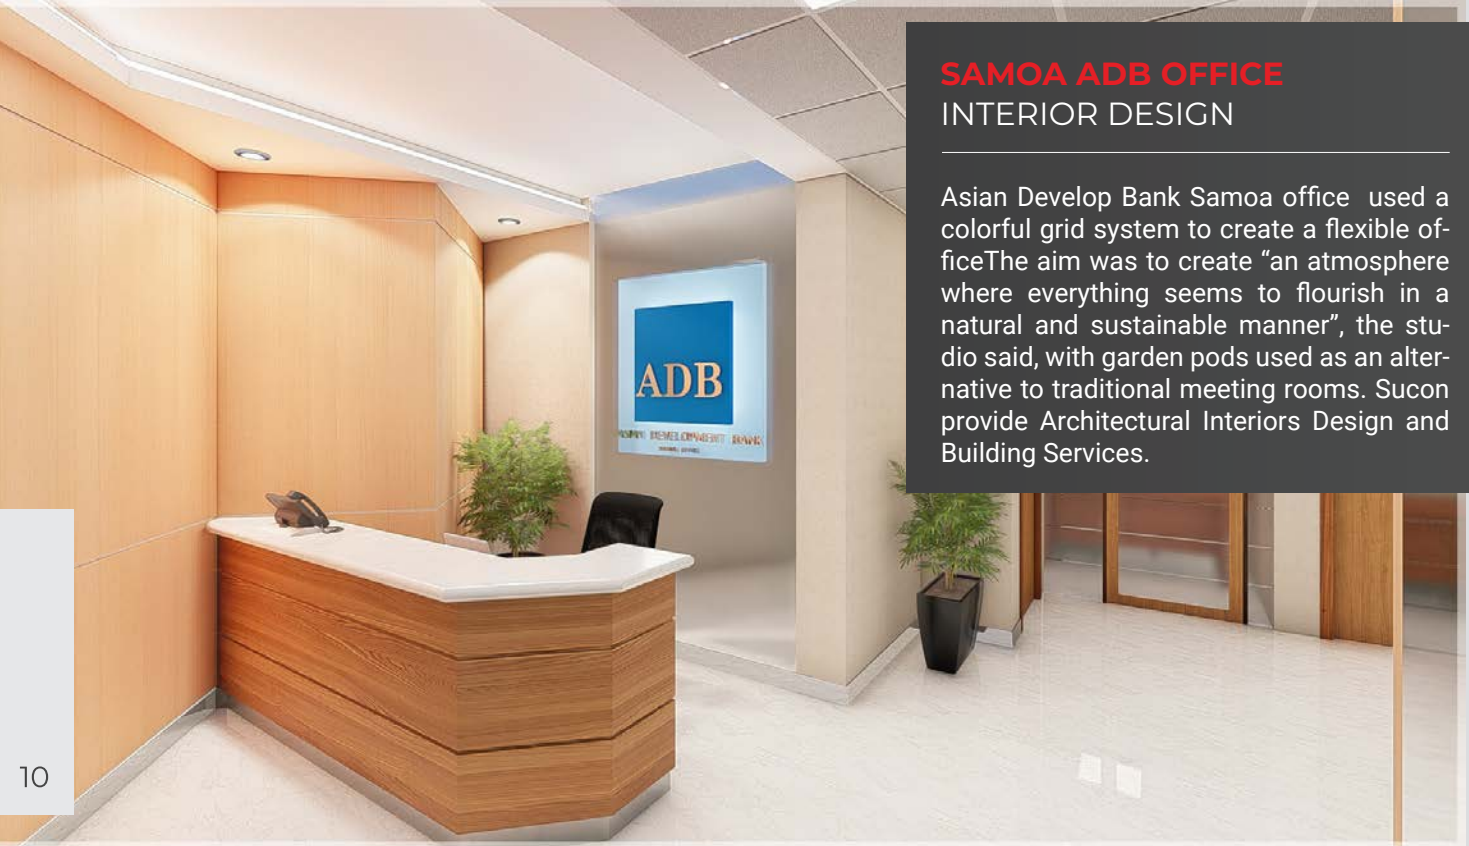

Apaula Height Villas

Sucon was commissioned by the client to carry out Architectural, Structural, Civil, Building services. The design of Moana Villas focuses on the critical relationship between indoor activity rooms, external playscapes and the visual and physical connection between them. In concert with this, natural light and ventilation foster calm, nurturing environments for children to enjoy

Samoa Commercial Bank 2018-2020

Sucon was commissioned by the client to carry out the supervision of construction implementation of the Samoa Commercial Bank. The project was supervised by the in-country Manager from the ground breaking last 2019 and up to the completion in 2020. The building is very modern complex building with steel sloping columns, cantilever floors spanning up to more than 3m.

SAMOA ADB OFFICE
INTERIOR DESIGN

Asian Develop Bank Samoa office used a colorful grid system to create a flexible office. The aim was to create “an atmosphere where everything seems to flourish in a natural and sustainable manner”, the studio said, with garden pods used as an alternative to traditional meeting rooms. Sucon provide Architectural Interiors Design and Building Services.

EPC TAGUMANONO OFFICE

Sucon was responsible for providing Architectural, civil, structural and project management services. The consultant carries out Architectural and Engineering design process. Sucon also assist EPC in procuring competitive contractor, with an estimated project cost of WST \$2M
